“Zim Here. This effort is to highlight the importance of Beliefs, express-ability and the available knowledge to us knowledge virtuosos on this planet.”

All Object(s) are said to be express-able as System(s) as Principal, Partial, Open Domain Expressions of Expression ... of Expressions with availability of development and / or reducibility to any identifiable object(s) express-able domain.

3

4

Mankind / Earth Recognized functions are express-able, mathematically and otherwise, as principal object(s) within Zim Math principal/ partial/ open domain express-ability. Also mankind's recognized shortcomings can be documented as so the called un-availability of principal /partial/ open domain express-ability for all identified object(s). This is shown with Jesus's healing ministry utilizing the "I am, I am" principal object(s) and it's available express-ability to man-kind.

Open Domain Development & Box Math Art

These art outlines with Expression of Expression(s) gives Additional express-ability options to a known & available "Horizons" intelligence idea where we gather information and plans for any perceived and possible Horizon. But with principal expression of open domain(s) we are able to arrive within some open domain where applicable principal expression(s) are still available and enable us again gain another principal and open domain outcome with an available Horizon expression-ability...

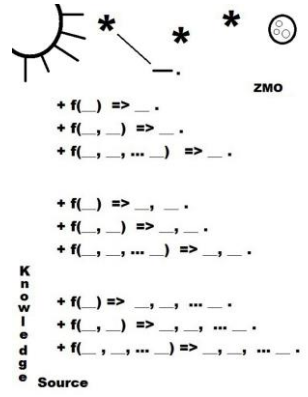

37

***Creativity* within these outlines, but with the recognized and available Expression of Expression(s) that give new Express-ability to the "Potter and the Clay" relationship as first mentioned in Isaiah of the Old Testament in the Bible. Where viable Expression of Expression(s) and Principal and/or Pseudo and/or Open Domain, Access and Outcomes, are given by object(s) as System AND Sub System(s). The documented Express-ability outlines of System AND Sub-System(s) in Zim Mathematics give this "Additional" relationship between the "Potter" and the "Clay".**

Object(s), Availability, and Express-ability

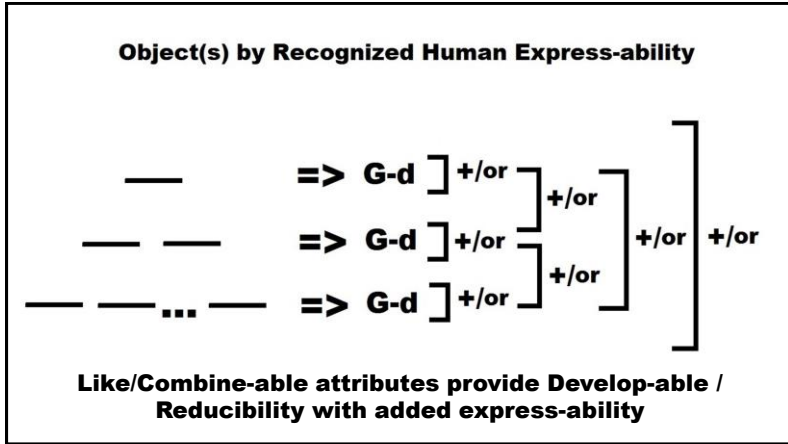

..principal / partial object(s). This can give Earth or Man kind "Additional" principal as well as partial express-ability. Pseudo explanation of pseudo origins / sources have limited usefulness. G-d as an object or object(s), or object or object(s) as G-d, could provide insight to sources / origins giving viable express-ability.

This helps explain origins to Earth or partial system expression(s) as a Birth of Viability / Non-Viability, also "known" as Express-ability / Non Express-ability. (See Adam / Eve in Book of Genesis in Bible). Available math principal Histories can also give additional origins and sources to our selves as..

50

Systems Mining within Contemporary paradigms is recognized as the searching or conquering of new lands, properties, and in recent times the acquisition of knowledge and technologies. The brightest hope in Systems Mining today is seen as perhaps mining asteroids or perhaps colonizing solar or other planets, such as Mars. These are very labor intensive and otherwise costly endeavors.

51

With the development of Systems concepts and Mathematics, new options may be within reach. Most Mining opportunities today are considered as a behavior with some productive outcome within a recognizable but limited domain. Any Zim Math Systems Mining opportunity is determined by available express-ability options.

52

A possible exception to this recognized di-lemma is the garden of G-d as described in the Bible,

Perhaps some Principal, Pseudo, Open Domain(s) "Farm" or Zim Math "Farm".
