Systems Math and Logic enable innumerable capability for identification of so-called threats and their innumerable formalizations.

AND All can be easily expressed in familiar principal / principal open domain context. Even the Expression of Expressions earthly kingdom can be stated in systems context and parameters making it subject to principal / principal open domain expressions.

7

... AND a universal / pseudo requirement of viability within principal / principle open domains. Everything must add up, within this available domain

USA Governance viability traditionally includes an armed citizenry ...

Zim Mathematics and Systems Express-ability can provide this.

8

Out of 48 Billion Systems Applications, there is the equivalent Non-Functional outcome for any identified object(s) of concern. Giving analysis, rationale for corresponding measure and principal outcome.

9

**Express-ability

Giving even more systems parametrization options.

ANSWER

The open domain provides a developable / reducible answer and/or non-answer. Possible constraints and parameterizations are enabled. Systems principal object(s) make this feasible. Object(s) as the identified systems components in Mathematical variation, combination may help achieves this outcome. Expressed/Non-Expressed.

“Non-Functional” Parametrizations across pseudo domains can give a “Stupid” Bomb. Or a systems completion by non-function.

- **Every() Any(1) Some (1 AND/OR 0) Non (1,0)**
- **Every(X) Any(1) Some (X) Non (X)**
- **Every(1,0) Any(X) Some (1 AND/OR 0) Non ()**
- **Every(1,0) Any(1,0) Some (1,0) Non (1,0)**

I consider this a very powerful systems-math principal express-ability AND Principal outcome. But the poetic, metaphor options for this enable some familiar options. I perceive this as an implicit/explicit origin and source to love and some recognized physical forces in implicit/explicit expressions as an unconditional logic. Poetic parametrizations of these could enable a Principal and Love outcome for any identified object(s), implicit/explicit systems, of concern.
