

**We all fight the Fallen World,
using Fallen Weaponry.
Genesis of the Bible.**

The Engine and Open Domain.

“Ghost Train”

Zim Olson Presenting.

1

**We are all fighting the fallen World with fallen
knowledge paradigms and methods.**

Genesis of the Bible.

Principal System Expression(s)

**A Benign & Dominant Paradigm. All
information may be enabled for this outcome.**

Zim Olson and Zim Mathematics

2

KJV II Corinthians 10

**3 For though we walk in the flesh, we do not war after
the flesh:**

**4 (For the weapons of our warfare are not carnal, but
mighty through God to the pulling down of strong
holds;)**

**5 Casting down imaginations, and every high thing
that exalteth itself against the knowledge of God, and
bringing into captivity every thought to the obedience
of Christ;**

Systems Math and Logic enable innumerable capability for identification of so-called threats and their innumerable formalizations.

AND All can be easily expressed in familiar principal / principal open domain context. Even the Expression of Expressions earthly kingdom can be stated in systems context and parameters making it subject to principal / principal open domain expressions.

7

... AND a universal / pseudo requirement of viability within principal / principle open domains. Everything must add up, within this available domain

USA Governance viability traditionally includes an armed citizenry ...

Zim Mathematics and Systems Express-ability can provide this.

8

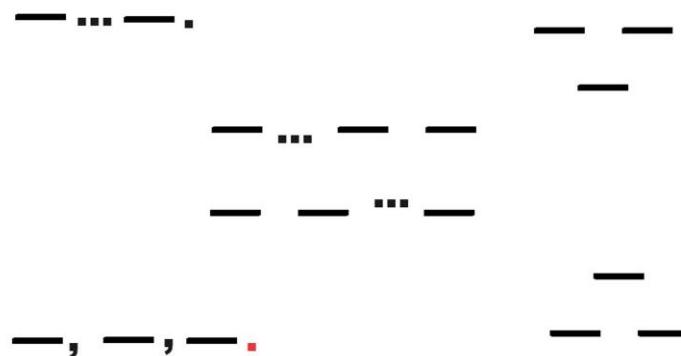

Out of 48 Billion Systems Applications, there is the corresponding Non-Functional outcome for any identified object(s) of concern. Giving analysis, rationale and measure for these principal outcomes.

9

**Express-ability
As
Variability in Object(s).**

Giving additional systems parametrization options.

10

11

**Systems Expressed,
In Principal Numeric Variability**

Giving even more systems parametrization options.

1,0,1+0, 1 or 0, 1 AND/OR _0

12

Question Z. OMS

What can you NOT do to Win a War?

ANSWER

13

The open domain provides a developable / reducible answer and/or non-answer. Possible constraints and parameterizations are enabled. Systems principal object(s) make this feasible. Object(s) as the identified systems components in Mathematical variation, combination may help achieves this outcome. Expressed/Non-Expressed.

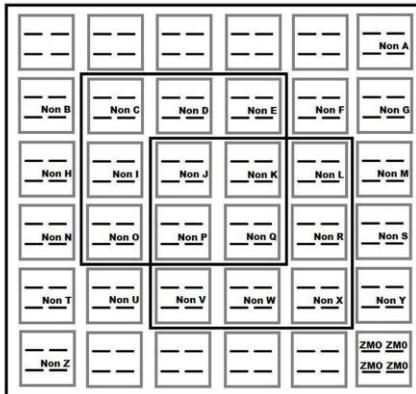

14

How to win a war by not doing a system something?

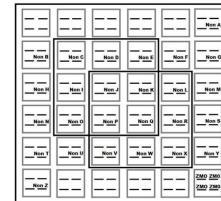

15

A Non-Reality Map

16

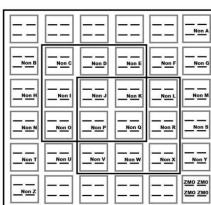

17

Systems Poetry and systems metaphors are helpful in implementing these proposed applications.

For instance, a + behavior could be interpreted as an identified functionality and a non behavior could be seen as some “stupid” or non-function in regard to this defined systems functionality.

18

Completion of given Reality / Non-Reality Map for object(s) of concern will provide a who, what, where, why, how of the provided system wide non-functional result. Enabling systems winning by not doing something or non-function.

“Non-Functional” Parametrizations across pseudo domains can give a “Stupid” Bomb. Or a systems completion by non-function.

19

A Systems Perspective on Express-ability of “Elimination”

Contemporary Systems Function of Elimination:

- Every(A-Z) Any(-) Some (A) Non (0)
- Every(W,X,Y) Any(-) Some (A,B,C) Non (0)
- Every(A,B,C) Any(-) Some (A) Non (B)
-

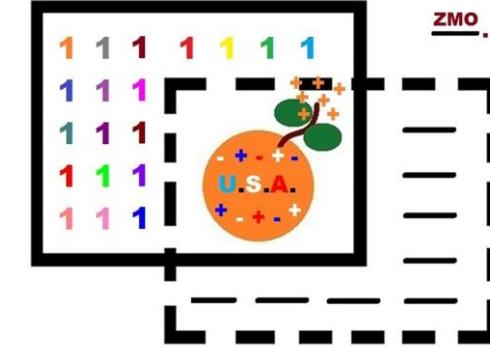

A Systems Completion w/ Universal Express-ability:

- Every() Any(1) Some (1 AND/Or _0) Non (1,0)
- Every(X) Any(1) Some (X) Non (X)
- Every(1,0) Any(X) Some (1 AND/Or _0) Non ()
- Every(1,0) Any(1,0) Some (1,0) Non (1,0)

20

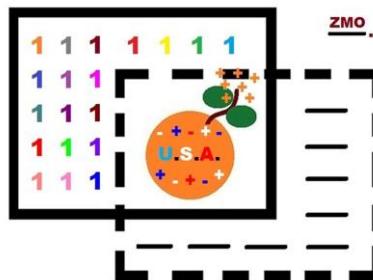

Application Outline. Principal + Open Domain

21

22

The Application outline gives an essential outline formulation for a principal open domain outcome with principal express-ability.

23

Don't forget these available outcome(s), principal objects as systems.

24

LIFE AND Death
Where the Answer is the Question !

$1 = 1+0 = 1,0 = 0$

$1 = 1,0 = 0 \quad 1,0 = 1+0 \quad //$
 $// \quad // \quad 1 \quad 1+0 = 1$
 $0 = 1,0 = 1,0 \quad //$
 $// = 1+0 = 0 = 1,0 = 1+0$
 $1 \quad // \quad // \quad //$
 $- = 0 = 1 \quad 1+0 \quad 0$

Every(1) Any(1+0) Some(1,0) Non(0)
Jesus Principality Object(s).

25

**A concept outline for the
Mathematically intuitive.**

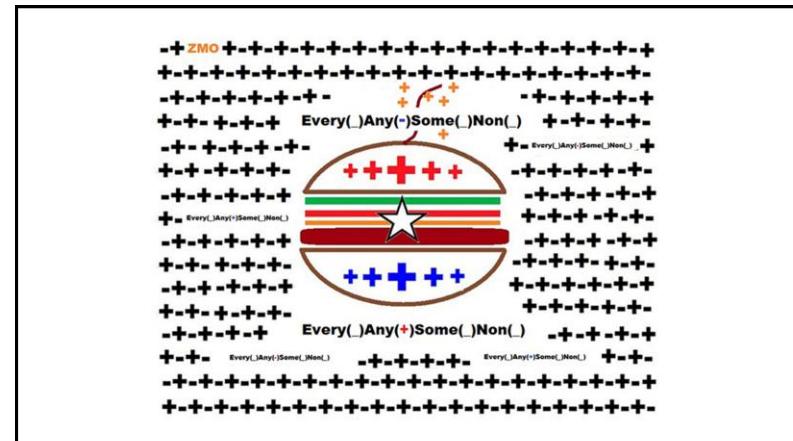

26

System Components & Operations

| | | | | |
|-----------------|-----|-----|-----|-----|
| $+$ | $+$ | $+$ | $+$ | $+$ |
| $A + B + C + D$ | | | | |
| $+$ | $+$ | $+$ | $+$ | $+$ |
| $A + B + C + D$ | | | | |
| $+$ | $+$ | $+$ | $+$ | $+$ |
| $A + B + C + D$ | | | | |
| $+$ | $+$ | $+$ | $+$ | $+$ |

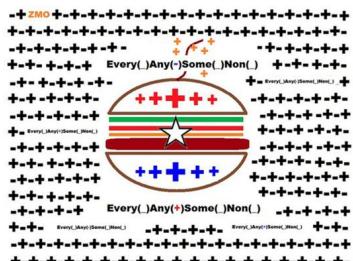

Giving an unimaginable or un-calculable system or principal system expressability. Visualizing the universal system(s) expressability option.

27

28

Partial vs. Complete Object(s) Express-abilities.

Zim Mathematics – The *Secret* Ingredient

29

A proposed dominant express-ability and utilize-ability of all information. Giving measures of principal outcome(s).

$$1=0=1+0$$

Principal System(s) as Expressed
Every(1=0=1+0)Any()Some()Non()

30

Mathematics, particularly Systems Math. A Principal deterrence to Pseudo and Partial Systems State dominance. Establishing a Uni-versal but otherwise perceived impossibility, a mathematical Front to partial system(s) confrontation. 47 Billion universal systems express-abilities can easily start to fuel this option.

Some of this is easier than falling off a log. And as said in Mathematics, anything can be shown to be true, but w/ systems math, explicit values are possible.

31

Pseudo Scientists need to do the Math.

Partial Pseudo Systems War:

Every (War)Any(+War) Some(A) Non(B)

Versus a Principal Complete system Event(s)/Series:

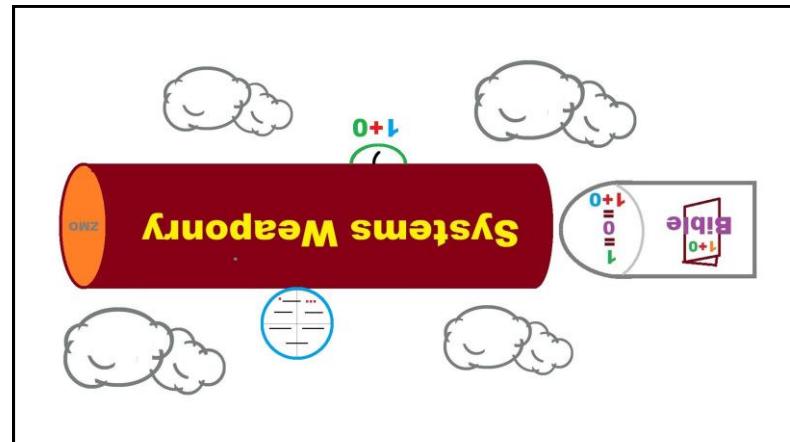

Every(War)Any(War) Some(1,0) Non(War)

32

All this applicable to yourself

"This may not make sense without Mathematics"

33

34

Love Never Fails

G-d As Expressed
Or the "I Am", Operational System Unknown

| | |
|------------|--|
| Every(_) | Every(X) Any(X) Some(X) Non(X) |
| Any (_) | Every(X) Any(X) Some(X) Non(X) |
| Some(_) | Every(X) Any(X) Some(X) Non(X) |
| Non (_) | Every(X) Any(X) Some(X) Non(X) |

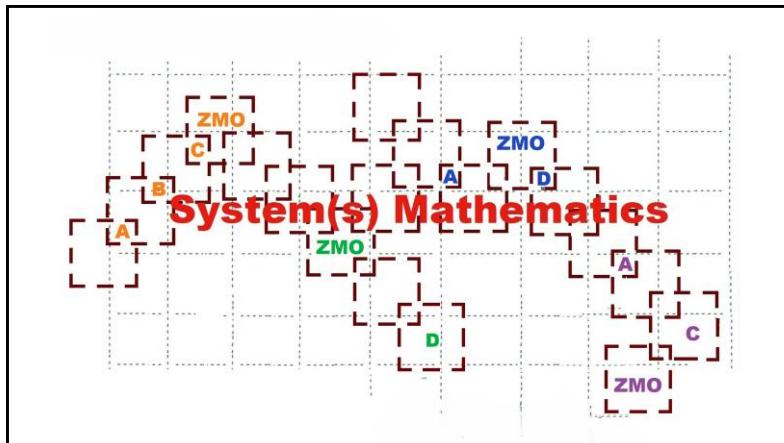

Principal System Any

35

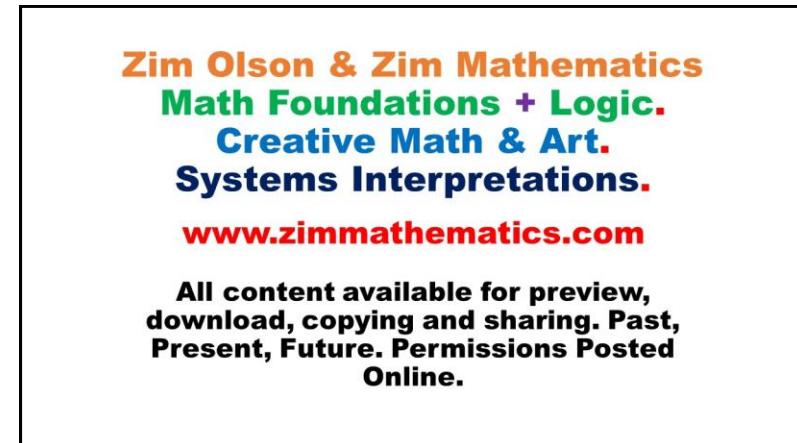

Systems/Outline completion with poetic, metaphors for this enable some familiar options. I perceive this as a legitimate method to express love and recognized physical paradigms. Such as an unconditional logic for expressed System(s). Giving the Answer + Question for the expression of expression(s), the documented mathematical conflict in our fallen world. Systems outline variation to suit contemporary paradigm construct is easily attainable. Zim Math systems component construct is simply our Adam-Construct Earthly derivations.

Metaphor-Poetic system parametrizations of these could enable a Principal / Love outcome. ...
