

My Computer & Information Science and Mathematics, Bachelor of Science, is apparent throughout my work in Creative Math and Art. The original content is not only notable; but it's unique portability to other math demographics and the developability and reducibility in other's work. Zim Mathematics is making a large global impact on available intellectual infrastructure. There should be many fewer Mathematicians wondering what to do with their time. The content of **Zim Olson and Zim Mathematics is easily summarized**. Systems Interpretations

of knowledge, math, art, law object(s) is easily accepted. Indeed, this has been done throughout recognized history. But the methodologies have been purely implied / explicit, and on a pick and choose basis. Zim Math documents contemporary paradigms as systemically limited by the dominant expression of expression(s) methodologies utilized. Our source to conflict and irreconcilable rationale. Zim Mathematics as Creative Math and Art with Systems interpretations does not claim a set of algorithms with sets of outcomes.

The “Math Sapien” Prayer by Zim

Math Sapien, who art nowhere.
And doesn't really care.
The name, His only claim to fame.
His will be done. The Math Sapien's true, virtue.
Give us this our daily Bread and Breath.
For this we are thankful till death.
Destination, uncharted. Math continues as our hope.
Our Earthly Stuff, Is never enough. Giving Cumulative value.
But does not always add up.
Infinite cumulative series our vision.
Hoping for it to finally appear, it only disappears.
Mathematical systemic issues continue,
The only certainty of today.

In progress, forever.

Principal Object(s) documented as systems enable a mathematical object(s) developability and/or reducibility of expression(s) to all recognized domains. This could well include the Jesus principality. The Jesus principality is not applicable within the expression of expression(s) methodologies and this knowledge dominion on Earth. Completion vs. Omission expression methodologies are documentable with this Mathematics. Mathematics in Object(s) variation and variability is of interest. Expressed mathematical object(s) with intersection variation of systems components can produce a Space Mathematics.

The expressed Adam-system gives contemporary explanations of Earth knowledge systems. Tenets, logic, foundations, outcomes.

Our current state of Scientific, Math and Law knowledge has been built with omission of information methodologies. This accepted expression of expressions express-ability has given mankind partial system outcomes, systemic misinformation, truth vs false, Life or Death, and non-express-able terminal event(s) and/or series paradigms.

Zim Mathematics as Systems Mathematics with an identifiable 47 billion Universal express-abilities for any object(s) can easily serve as our Economic Engine of all Economic Engines. This same Mathematical express-ability can serve as a global deterrent to any pseudo-partial systems dominance or threatened dominance.

This is my version of Creative Mathematics.

I have decided to treat the content on my website as an introduction to my approach to Mathematics. And not to be so concerned about a final definitive content. I would like to outline my content in various formats enabling the readers to understand and proceed more easily on their own, on this approach of Creative Math and Art with Systems interpretations. I document many new Math Foundations and Logic I have derived from these exercises. I show many new understandings, tenets, logic, origins, applications of contemporary paradigms documented with in various outline formats.

Contemporary Expressions with the Earth-Adam Systems Construct

At some point, “Adam” Mankind assumed a system(s) ownership. As the creator-creation, source, ruler, of intelligence, and all knowledge. This expression of expression(s) event(s)/series is described in the Bible as the Fall of Earth/Mankind.

Working knowledge continues by leaving out information from contemporary encyclopedias of information. In fact, this is an assumed methodology to acquire additional understanding. Non like and non-combinable attributes are simply “omitted” to acquire this new knowledge. All within the same fallen knowledge methodologies.

So called new and additional knowledge is a variation in form only with same outcomes. Terminal series/events as expressed.

Contemporary Physical Sciences utilize only a partial axiomatic imagery available within Mathematics. This has been done with full consciousness and application outcomes as the principal focus.

Zim Math System Concepts: Four Behavioral Components for any existential system object. Every object has a functional context, **Every(x)**; a System and no Sub System functionality **Any(x) or f(x)**; A Non stated functionality, **Non(x)**; and a resultant intersecting functionality, **Some(x)**. Zim does not claim a set of algorithms with sets of outcomes. No method of adding Apples and Oranges as in contemporary Mathematics.

Principal express-ability needs to be in the driver's seat and Pseudo Science in the Passenger seat. Pseudo-Science needs to do the mathematics. Systems Math and Express abilities are documented as the dominant paradigm to the Sciences of Partial Systems Physical object(s) expression of expression(s).

“Adam” assuming ownership of express-ability left us the partial-system domain of analysis and rationale. The source to all our contemporary GREAT paradigms. Expressed systems give us all our irreconcilable logic.

Partial vs Complete Express-abilities. The Biblical Fallen Earth consists of the kingdoms of Partial Systems and Express-ability. Partial Systems Dominance can be viewed within such art outlines. Expression of Expressions Dominion as Time giving Terminal , non-express-able items / events. 47 Billion universal systems express-ability options can be readily visualized and applied.

Like or combine-able system attributes can not only provide paradigm express-ability but viability as well. Systems attributes in practice can be expressed or non-expressed. Providing additional existential express-ability and otherwise.

Expressions of Expression(s) are quite often not combine-able and a constant source of Earthly conflict or irreconcilable logic.

Object(s) variability provides additional paradigm develop-able and reducible viability. As I have documented in Zim Mathematics this can enable a Space Mathematics of Space systems of variable principal object(s) express-abilities.

Creative Math and Art are shown to provide visual systems express abilities not easily calculated.

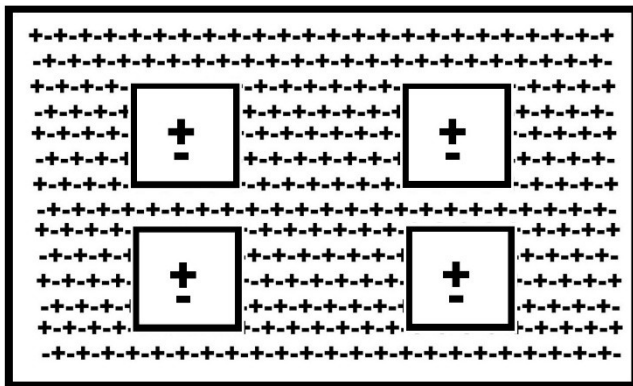

The Human acquired domain of Expressions of Expressions makes our knowledge exceedingly untenable. Identified principalities numeric and otherwise show us an otherwise “lost highway” to important knowledge.

Follows are more examples of my Creative Math and Art documenting important possibilities to the Earthly and Heavenly kingdom and knowledge kingdom.

Numerics more accurately documented as systems object(s). Explain long misunderstood numeric theories and metaphors.

Physical attributes expressed/non-expressed as partial systems object(s) provide essential insight to the development of these systems expressions of expressions.

Long held Earthly understandings for once can be understood and dealt with appropriately. Human behavior itself is more easily understood as systems object(s)

Monetary institutions could be comprised of principal/principle dollar units.

Math Art Maps of Energy / Sources as systems object(s) could give mathematical mining of this.

Object(s) principal / principle variation in Zim Math outlines is another example of principal domain development. **The mathematical versatility of the Zim Math Systems and/or Sub Systems as an** expressed/non-expressed paradigm is indicated on last page of this booklet. Showing how variations can document all prior, and future expression of expression(s) paradigms.

Stuff Theory – A synopsis: All object(s) and perceived object(s) consist of partial expressions of expressions. This dominant intelligence methodology leaves us with gathering intelligence and information from systems object(s) of systemically omitted information. Time experience is the product of this systemic intelligence methodology.

This systems expression of expression method gives all our existential experiences, lawful behavior, origins, tenets, foundations and logic. And variabilities.

Jesus claimed no ownership of Pseudo Knowledge. His claim was the Principal and Principal Open Domain System(s) express ability. In particular within the Adam-system of m-nkind. The Adam-System component of “Some” or Intersection of our system components is of important applicable relevance. RE Mathematics, Any topic/object(s) must lay within a Mathematical Map or any such mathematical paradigm may not be considered a valid paradigm.

The REASON we consider our country the Land of Promise and Opportunity is we consider and value our citizens as individuals. In fact, we have somehow known that all of us are absolutely unique, and that none of us are equal, at ALL. AND subsequently within our Country’s G-d given domain, recognized within principal and principal open domain express-ability, all our unique citizens have unique value that no one or anything else has. AND no one else can provide. This gives us foundations + rationale for valuing our citizens as individuals. The Jesus Promised Principality serves as the founding rationale/analysis AND viable outcome on Earth and Heaven. Our recognized source to wealth, health, freedom, prosperity & “Gold”.
